

*A major new journal from  
the American Society for Microbiology . . .*

**Editor in Chief:** Steven D. Douglas

**Editors:** James D. Folds, David E. Normansell, Noel R. Rose, Daniel P. Stites, and Theresa L. Whiteside

## **CLINICAL AND DIAGNOSTIC LABORATORY IMMUNOLOGY**

**Acquire** this exciting bimonthly publication and

**Enhance** your ability to keep up with the latest developments in human immune response assessment, including indications for testing, methods, and interpretation of results.

The essential **Complement** to your personal library, CDLI will bring together in a single journal authoritative peer-reviewed articles on a variety of topics currently scattered among numerous publications.

Articles describing the laboratory diagnostic aspects of the following will be included:

- humoral and cellular immunity, including specific immune cell functions (B cells, T cells, and their subsets)
- mediators and cytokines, complement components, and other serum proteins
- natural killer cells, monocytes/macrophages, neutrophils, and myeloid cells
- immune responses to infection caused by bacteria, viruses, fungi, and parasites
- AIDS and other retroviral diseases
- primary and secondary immunodeficiency disorders
- evaluation of hypersensitivity and autoimmune diseases
- histocompatibility and transplantation immunology
- lymphoreticular malignancies and cancer immunology
- immunogenetic testing applied to human disease diagnosis and evaluation
- immunologic monitoring, including flow cytometry and vaccine therapy
- laboratory immunology as related to allergy, dermatology, immunoematology, rheumatology, neurology, oral medicine, and other medical and surgical subspecialties

Novel animal models relevant to the diagnosis of human disease, animal studies on how to assess the immune response, new or evolving technology in diagnostic methods, establishment of normal immune responses and/or values, case reports, quality control, and biostatistics are also suitable topics for the journal. Minireviews, guest commentaries, and letters to the editor will be included.

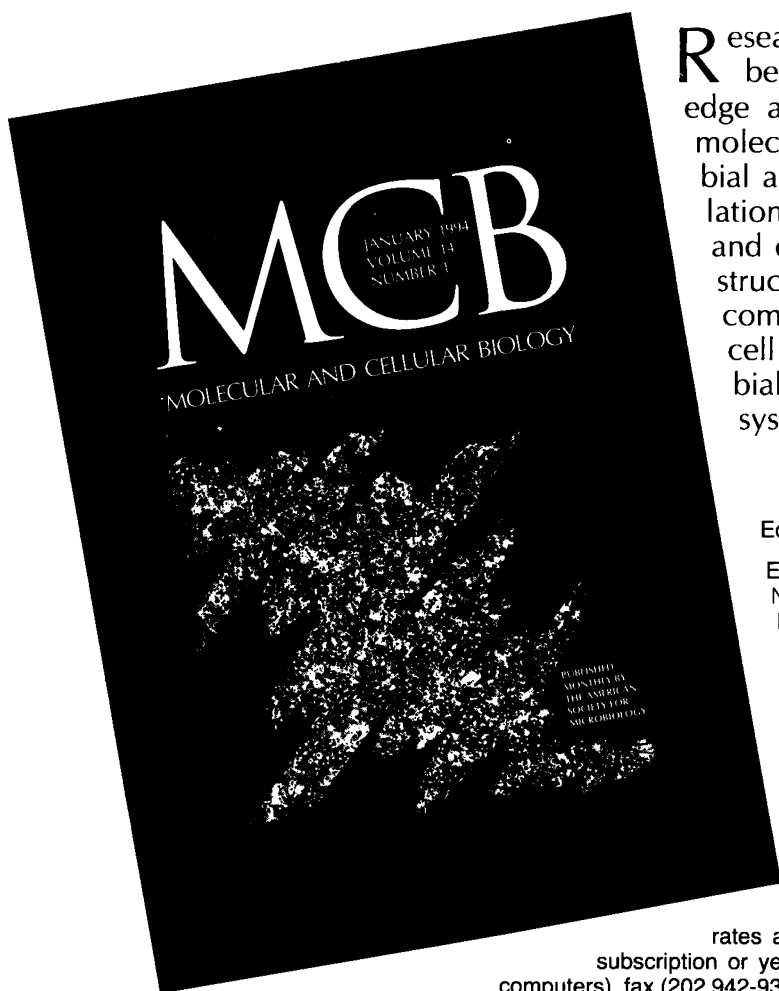

The format and procedures for publishing in CDLI are described in the **Instructions to Authors**, which may be obtained from the CDLI editors or from the ASM Journals Division (1325 Massachusetts Ave., N.W., Washington, DC 20005-4171; phone, 202 737-3600; fax, 202 942-9355).

ISSN 1071-412X. 600 pages/year. Bimonthly (6 issues/year). Members of ASM may subscribe at \$40 (U.S.A.) (Canadians add 7% GST) or \$68 (other countries). Subscriptions start with the January issue.

Join the American Society for Microbiology and subscribe at the **LOW MEMBER RATES** shown above for 1994. Limit is one personal subscription per member. For **NONMEMBER** rates and for information and pricing on CD-ROM versions (monthly subscription or yearly archival, for both MS-DOS and Macintosh personal computers), fax (202 942-9346) or write to the Subscriptions Unit at the address given above.

# MOLECULAR AND CELLULAR BIOLOGY...

# INDISPENSABLE

Researchers find *Molecular and Cellular Biology* to be an authoritative source of fundamental knowledge and new developments in all aspects of the molecular biology of eukaryotic cells of both microbial and higher organisms. The scope includes regulation of gene expression, transcription, cell growth and development, oncogenesis, cell and organelle structure and assembly, DNA replication and recombination, chromosome structure, and somatic cell genetics. The journal publishes work on microbial as well as higher organisms and on viral systems where the emphasis is clearly on the cell.

Editor in Chief: Alan M. Weiner

Editors: James C. Alwine, James R. Broach, Lawrence A. Chasin, Nouria Hernandez, Anita K. Hopper, Tom Kadesch, Robert E. Kingston, Adrian R. Krainer, Douglas R. Lowy, Charles J. Sherr, Nahum Sonenberg, George F. Sprague, Jr., Shirley M. Tilghman, Jonathan R. Warner, Michael J. Weber, Elton T. Young, and Kenneth S. Zaret.

ISSN 0270-7306. 8,200 pages/year. Monthly. Members of ASM may subscribe at \$80 (U.S.A.) (Canadians add 7% GST); \$105 (other countries). Subscriptions start with the January issue.
